

# Example Instructions for Learning to Dig

Put the name of the level at the top.

Always start by telling the reader to click Play.

List EVERY step that the reader should do.

## Level 1: Learning to Dig

1. Click the Play box to start the level.
2. Wait until the first penguin that comes out is directly above the exit and then click on it.
3. Watch the penguin dig down through the stone to reach the exit beneath.
4. Watch as all the penguins make it safely to the exit.

The final step should, in some way, tell the reader that s/he has nothing more to do except watch and wait.

Use clear and descriptive words to give the reader a good understanding of what should happen.
