| Brainstorming and Research Guide |
|---|
| To help you figure out what type of wearable to design and create, answer the following questions within your group. When engineers problem solve, they come up with as many ideas as possible before determining the best idea to pursue. At this point, write down ALL your ideas! |
| 1. What specific technologies and electronics do people use in their everyday lives? |
| |
| |
| |
| 2. What areas of your life might be made better if you had some technology to help you? |
| |
| |
| 3. What areas of health care might benefit from a wearable technology? |
| |
| |
| |
| 4. Check out the links on wearables that your teacher provides. What ideas came from this research? |
| |
| |
| |
| 5. Describe your team's idea that you will proceed to design: |
| |

 Team names:
 ______ Date:
 ______ Class:
