Erosion in Rivers Post-Quiz

How did erosion help or hurt all the buildings on the river? What about your building?

In the boxes below, draw your building before and after the flood.

BEFORE

AFTER

Respond to the statements below by choosing your level of agreement with each.

Statement	Agree a lot	Agree	Disagree	Disagree a lot
I want to learn more about 3D printers. OR, if you used LEGO pieces: I was excited to see all the different possible building designs using the same pieces.				
Civil engineers should know the content and properties of the soil of the surrounding area prior to the design and construction of buildings and structures.				
Buildings should be located very close to rivers, even if the soil is not suitable for holding the building weight.
