Alternative Energy Pros and Cons Worksheet

Type of alternative energy:

Individual work:

Define alternative energy source:

What are the pros and cons of the energy source you focused on?

Pros	Cons

Highlight 2 pros and 2 cons that you think are most important to share with the rest of your group. When everyone has learned about the alternative energy source they are focusing on, share what you have identified as most important with your group. Take notes in the table below so that you can share this information with your poster group.
